OK I'll do that. Our conference lines can handle 6 callers but if we have more than that I have other options.. I have a couple of people here who may be interested in participating if you don't mind; a couple from permits and one other possible person in my group. Let me know your head count on your side. I'll send out an invite later this week with conference call information. Thanks again for reaching out.

Ok great. If you could set up the conference line that would save me an ear beating from Jason.

Tim,

We are all available on 4/19 or 4/18. Let me know the date and time that works best for you.

Thanks you,

Shaun

That's fine. I'll keep it general. [Ex. 6 Personal Privacy (PP)] so we'll have to find another data. I'm still waiting for a response on your MERPs question so maybe more time will help plus give me some more time going through the protocol. Talk to you in another week or so.

Tim,

I would like to keep the discussion general at this point. You could talk about the common issues that you have seen, along with general concerns with these types of projects, then we can discuss any concerns on our end. The consensus between the folks her at ACHD is that 4/11 would be the first day that we would be available. If that works for you, we can set up the call in either the morning or afternoon. Let me know your availability and if that date doesn't work I'll try to find a day that does.

Thank you,

Shaun

I'll be forwarding your MERPs question to George. I'm not sure what type of feedback you'd like from me. I can try and walk you through my general concerns with projects like this. If you'd like maybe we could have a

quick call in a week or two to discuss what concerns you may have. This is a relatively small plant but there are some common issues I've seen that we could discuss. Let me know what you'd like to do; I don't want to overstep my bounds since this is ACHD's project. I can check with our permits folks if you think having them on would be helpful.

Tim,

I spoke with the permit engineer and she doesn't think ACHD will go to public comment until mid-May at the earliest.

Thanks for sharing this with me. How long do I have to look at this and get back to you with any comments? I did a quick look and didn't see anything that I haven't seen with other projects in R3.

Subject: Proposed Combined-Cycle Power Plant in Elizabeth Township

Tim,

ACHD staff members met on 1/4/19 with two members of Invenergy and two members of All4 LLC to discuss a proposed Combined-Cycle Power Plant in Elizabeth Township.

This is a continuation of a project that was slated for development in the Buena Vista section of Allegheny County around 2014, but got shelved until now.

The new site is within a few miles of the border to Westmoreland County and modeling impacts could potentially affect the airsheds outside of Allegheny County.

Attached is All4's Modeling Protocol, on behalf on Invenergy, to support major NNSR permitting for the proposed plant. ACHD would ask if you could assist in reviewing the protocol.

I have a question on the appropriate Eastern US NOx MERPs value to use for 8-hr Ozone, but I will send that in a second email.
